

Project Initialization and Planning Phase

Date	28 September 2026
Team ID	6ab4d2876603573ccfb56348
Project Name	AI-WeatherWise
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A working professional who checks the weather every day.	Quickly see the current temperature, humidity, wind and condition for my city.	The raw numbers alone don't tell me what to wear or how to plan my day.	Most weather apps show data with no plain-language explanation.	Confused and unsure how to prepare for the day.
PS-2	A frequent traveler who follows the weather in several cities.	Keep track of the weather in all my favorite cities in one place.	I have to search for each city again every single time.	Apps don't let me save and manage a personal list of locations.	Frustrated and short on time.

PS-3	An outdoor enthusiast planning workouts and trips.	Get clear advice on clothing, hydration and activities for today's conditions.	I can't tell whether the weather is actually suitable for my plans.	Forecasts lack smart, conditionspecific recommendations.	Uncertain and worried about being caught unprepared.
PS-4	A user who creates an account to save my cities.	Keep my saved locations and profile private and secure.	I worry my login details could be exposed or misused.	Not every weather service protects accounts with secure authentication.	Anxious about sharing my personal information.
