

Solution Architecture

Date	28 September 2026
Team ID	6ab4d2876603573ccfb56348
Project Name	AI-WeatherWise
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Allows users/developers to send requests to the backend API and view weather responses.	Thunder Client / Postman
API Gateway	Receives client requests, routes them to the appropriate backend logic, and sends responses back to the client.	Express.js
Microservices	Handles weather data retrieval, processing, AI-based weather analysis, validation, and business logic.	Node.js, Express.js, Axios
Database	Stores relevant weather and application data for retrieval and future use.	MongoDB, Mongoose
