

Demonstration of Proposed Features

Demonstration of Proposed Features:

This document captures the features proposed for AI WeatherWise and records whether the feature is implemented and demonstrated. It serves as evidence of the team's ability to deliver the proposed backend solution.

Feature Implementation Summary:

Date	15 March 2024				
Team ID	6ab4d2876603573ccfb56348				
Project Name	Weather & Location Analytics Backend				
Maximum Marks	1 Mark				
S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Authentication & JWT	Registration/login and backend authentication flow for authorized access.	Implemented	Yes	Authentication is part of the backend design.
2	Real-time Weather Data	Fetch weather information for the selected location through a weather service API.	Implemented	Yes	Location, temperature, condition, humidity and wind speed are processed.
3	Location Management	Save and retrieve user favorite locations.	Implemented	Yes	Location-management feature selected during brainstorming.
4	AI Smart Recommendations	Generate weather summaries and contextual activity recommendations.	Implemented	Yes	AI-based recommendations help users understand weather conditions.
5	Express API Routing & Postman	Centralized API routes and API testing using Postman.	Implemented	Yes	JSON responses are verified through API testing.
6	MongoDB & Environment Config	Store user information and manage backend/database configuration securely.	Implemented	Yes	MongoDB and environment variables are part of the backend setup.
