

Project Demo Planning

Project Demo Planning:

A well-structured demo plan ensures that the team presents AI WeatherWise effectively, covering the project flow, key backend features, API testing and team responsibilities.

Demo Flow Summary:

Date		15 March 2024		
Team ID		6ab4d2876603573ccfb56348		
Project Name		Weather & Location Analytics Backend		
Maximum Marks		1 Mark		

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the weather-information problem and project objective.	1	Dharshini A
2	Solution Overview	Explain Node.js, Express.js, MongoDB, weather API and AI recommendation flow.	2	Dharshini A
3	Authentication & Backend Flow	Show authentication and explain backend request handling.	2	Dharshini A
4	Weather & Location Features	Demonstrate weather data and favorite-location operations.	3	Savitha sree M / Lavanya S
5	AI Recommendation & API Testing	Show AI summary/recommendation and Postman JSON responses.	3	Keerthana S / Savitha sree M
6	Q&A Session	Answer questions about implementation and future enhancements.	1	All Members

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the weather-information problem and project objective.
2	Solution Overview	Introduce Weather & Location Analytics Backend and its technology stack.
3	Live Feature Demonstration	Show authentication, weather API, location management, AI recommendation and Postman testing.
4	Q&A Session	Respond to questions and explain future scope.
